

WebAppBuilder Curriculum

Do you want to learn how to build web and mobile ArcGIS applications without writing a single line of JavaScript, HTML, or CSS code? The new Esri **WebApp Builder** is a configurable HTML5/JavaScript based application that lets you quickly create intuitive, focused 2D and 3D apps from scratch without writing a single line of code. If you happen to be a developer as well you can also extend the application to create custom tools and application themes.

Modules:

Introduction to **WebApp Builder**

Download and Install **WebApp Builder**

Creating Your First Application with **WebApp Builder**

Designing Your Application with Themes

Adding Basemaps and Layers

Adding Widgets

Defining Attributes

Previewing Applications on Different Platforms (Responsive Design)

Creating and Using Templates
